

Product datasheet

anti-Chlamydia mouse monoclonal, ACI, lyophilized, purified, 50 µg

Short overview

Cat. No.	ACI-P
Quantity	50 µg
Concentration	50 µg/ml after reconstitution with 1 ml dist. water

Product description

Host	Mouse
Antibody Type	Monoclonal
Isotype	IgG3
Clone	ACI
Immunogen	Chlamydia antigen
Formulation	Lyophilized; reconstitute in 1 ml dist. water (final solution contains 0.09% sodium azide, 0.5% BSA in PBS buffer, pH 7.4)
Conjugate	Unconjugated
Purification	Affinity chromatography
Storage before reconstitution	2-8°C until indicated expiry date
Storage after reconstitution	2-8°C
Intended use	Research use only
Application	ELISA, ICC/IF, IHC
Reactivity	Chlamydia genus

Applications

ELISA	Assay dependent
Immunocytochemistry (ICC)	1:10
Immunohistochemistry (IHC) - paraffin	Assay dependent

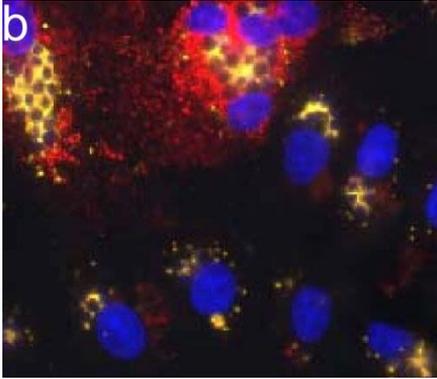

Background

Mab ACI recognizes a genus-specific epitope of the Chlamydia lipopolysaccharide antigen and identifies all serovars (A-C, D-K, L1-L3) of *C. trachomatis* as well as *Chlamydophila psittaci* and *Chlamydophila pneumoniae* with a strong fluorescence of the intracellular inclusions, the pinhead-sized extracellular elementary bodies and the free cell-associated Chlamydia lipopolysaccharide antigens (amorphous foci). A positive cross-reactivity was also reported for *Chlamydophila pecorum*.
