

Product datasheet

anti-Laminin rabbit polyclonal, serum

Short overview

Cat. No.	10765
Quantity	250 µl

Product description

Host	Rabbit
Antibody Type	Polyclonal
Immunogen	Laminin isolated from Engelbrecht-Holm-Swarm (EHS)-mouse sarcoma
Formulation	Contains 0.09% sodium azide
UniprotID	A0A3Q1LUC5 (Bovine),P25391 (Human),P19137 (Mouse),A0A4X1VLN1 (Pig),H0VND7 (Guinea pig),G1TTH9 (Rabbit),G1TTH9 (Rabbit),D4A409 (Rat)
Synonym	Laminin subunit alpha-1, Laminin A chain, Laminin-1 subunit alpha, Laminin-3 subunit alpha, S-laminin subunit alpha, S-LAM alpha, LAMA1, LAMA
Note	Centrifuge prior to opening
Conjugate	Unconjugated
Purification	Stabilized antiserum
Storage	Short term at 2-8°C; long term storage in aliquots at -20°C; avoid freeze/thaw cycles
Intended use	Research use only
Application	IHC, WB
Reactivity	Bovine, Human, Mouse, Pig, Rabbit, Rat

Applications

Immunohistochemistry (IHC) - frozen	1:50-1:100
Immunohistochemistry (IHC) - paraffin	1:50-1:100 (proteolytic treatment required; enzyme: pepsin)
Western Blot (WB)	Assay dependent

Background

Laminin is a glycoprotein (Mr 850 - 1.000 kD, consisting of 3 glycosylated polypeptide chains with molecular weights of 440 and 225 (2x) kD) produced by various human epithelial and mesenchymal cells, and forms an extracellular matrix of thin filaments. In normal tissues, laminin is invariably present in all basal laminae surrounding muscle, nerve, fat and decidua cells and separates epithelial and endothelial cells from abutting connective tissues. Laminin has also been identified within the cytoplasm of breast epithelia, stromal cells of the endometrium, and within endothelial, bile duct epithelial and mesenchymal cells of the liver. Laminin has been found to be involved in cellular activities such as adhesion, spreading, differentiation, polarization, proliferation, locomotion, tissue invasion and chemotactic responses. No cross reaction was obtained with human type I, III, IV and V collagen in immunoblotting, whereas the antibody reacted with a distinct band of appr. 200-220 kD from a 8M Urea extract from amnion basement membrane.

Positive control: skin, kidney.
