

Product datasheet

anti-MLH1 mouse monoclonal, IHC409, purified

Short overview

Cat. No. 691743 **Quantity** 1 ml

Product description

HostMouseAntibody TypeMonoclonalIsotypeIgG2aCloneIHC409

Immunogen Recombinant Human MLH1

Formulation Tris pH 7.3-7.7 with 1% BSA and 0.09% sodium azide

UniprotID P40692 (Human)

Synomym DNA mismatch repair protein Mlh1, MutL protein homolog 1, MLH1, COCA2

Conjugate Unconjugated

Purification Affinity chromatography

Storage 2-8°C

Intended use Research use only

Application IHC **Reactivity** Human

Applications

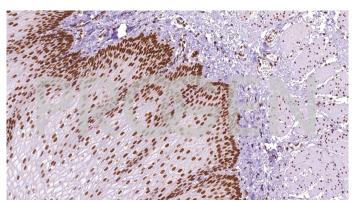

Immunohistochemistry (IHC) - paraffin

1:50-1:200 (microwave treatment recommended)

Background

MutL Homolog 1 (MLH1) is a protein involved in the mismatch-repair pathway. This protein is commonly associated with hereditary non-polyposis colorectal cancer, as the MLH1 gene is frequently mutated in patients with this cancer. Studies have shown MLH1 to be deficient in a high percentage of patients with microsatellite instability, as well as endometrial and ovarian cancers. Use of Anti-MLH1 is optimized when paired in an IHC panel with MSH6, MSH2, and PMS2. Anti-MLH1 is useful in the detection of MLH1 in a number of normal and neoplastic tissues, and for identifying a loss of MLH1 in tumours that are microsatellite-unstable.
