

Product datasheet

anti-Keratin Type I mouse monoclonal, AE1, purified

Short overview

Cat. No.	61804
Quantity	200 µg (1 mg/ml)
Concentration	1 mg/ml

Product description

Host	Mouse
Antibody Type	Monoclonal
Isotype	IgG1
Clone	AE1
Immunogen	Human epidermal keratin (formerly also designated cytokeratin)
Formulation	PBS pH 7.4 with 0.09% sodium azide
Note	Centrifuge prior to opening
Conjugate	Unconjugated
Purification	Affinity chromatography
Storage	Short term at 2-8°C; long term storage in aliquots at -20°C; avoid freeze/thaw cycles
Intended use	Research use only
Application	ICC/IF, IHC, WB
Reactivity	Bovine, Chicken, Dog, Human, Monkey, Mouse, Rabbit, Rat

Applications

Immunocytochemistry (ICC)	Assay dependent
Immunohistochemistry (IHC) - frozen	1:200
Immunohistochemistry (IHC) - paraffin	1:200 (protease treatment and/or microwave treatment recommended)
Western Blot (WB)	Assay dependent

Background

AE 1 represents an excellent marker for distinguishing carcinoma from non-epithelial tumors. Tumors specifically detected: all epithelium-derived tumors. Polypeptide reacting: Mr 40,000; Mr 48,000 and Mr 50,000 polypeptides of human epithelial proteins (keratins nos. K19, K16, K14) and most other acidic (type I) keratins. Reactivity on cultured cell lines: MCF-7, A-431, RT 112.
