

Product datasheet

anti-Keratin K10 guinea pig polyclonal, serum

Short overview

| | |
|----------|--------|
| Cat. No. | GP-K10 |
| Quantity | 100 µl |

Product description

| | |
|----------------------|---|
| Host | Guinea pig |
| Antibody Type | Polyclonal |
| Immunogen | Synthetic peptide of human keratin K10 (formerly also designated cytokeratin 10; C-GS VGE SSS KGP RY), coupled to KLH |
| Formulation | Contains 0.09% sodium azide and 0.5% BSA |
| UniprotID | P13645 (Human), P02535 (Mouse), Q6IFW6 (Rat) |
| Synonym | Keratin, type I cytoskeletal 10, Cytokeratin-10, CK-10, Keratin-10, K10, KRT10, KPP |
| Note | Centrifuge prior to opening |
| Conjugate | Unconjugated |
| Purification | Stabilized antiserum |
| Storage | Short term at 2-8°C; long term storage in aliquots at -20°C; avoid freeze/thaw cycles |
| Intended use | Research use only |
| Application | ICC/IF, IHC, WB |
| Reactivity | Human, Mouse, Rat |

Applications

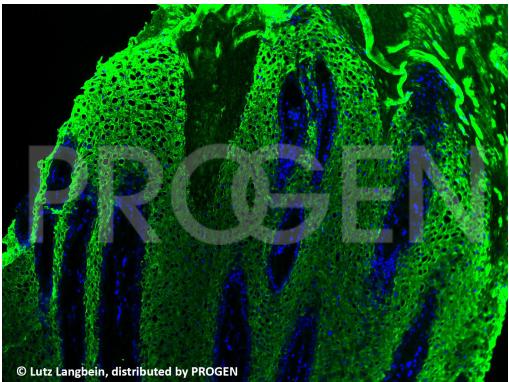

| | |
|--|---|
| Immunocytochemistry (ICC) | Assay dependent |
| Immunohistochemistry (IHC) - frozen | 1:100-1:200 |
| Immunohistochemistry (IHC) - paraffin | 1:100-1:200 (microwave treatment recommended) |
| Western Blot (WB) | 1:250-1:1,000 |

Background

MW 56,5000 (pI 5.3) intermediate filament polypeptide, keratin K10, detected by immunohistochemistry in the suprabasal layers of human epidermis (basal cells are negative). Useful for the recognition of keratinizing cells in squamous cell carcinoma of epidermis, lung, bladder, cervix, esophagus etc. Completely negative on non-stratified epithelia.

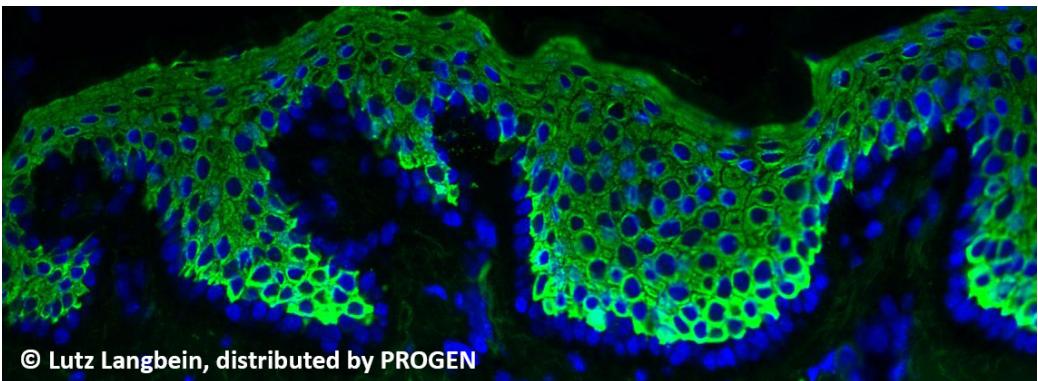

Positive control: human suprabasal keratinocytes of epidermis; squamous cell carcinoma.
